

DD/A/ODP WEEKLY REPORT

Week of 7-14 October 1977

I. Major Activities During the Past Week:

A. Support to OF

1. CONIF - Management of information on Agency contracts and interface problems. Since the first week of August, twenty one problems have been uncovered by the acceptance testing. Three of these problems remain unresolved, but are expected to be corrected in the near future. Acceptance testing is continuing with weekly meetings being held with the customer to discuss the status and problems of testing. [REDACTED] STATINTL
2. GAS - General Accounting System. The GAS celebrated its first birthday this past week. A lot of computer time was necessary to 'close the books' for the year. Sixty (60) hours of unpaid overtime was required. This effort saved the Office of Finance several man-months of work plus it reestablished 'lapsed year' obligations in one day as opposed to a manual process which had taken months in previous years. [REDACTED]
3. PAYROLL - The Agency payroll system. The user began his testing for the changes in the system as a result of Legal Requirements. All seems well so far. [REDACTED] STATINTL

STATINTL

B. Training During the Past Week:

A four day course, RAMIS, was completed by 15 students.

Nothing to report on FOIA.
